

Property Damage Claims Policy Manual - Xactimate Estimates

1. Line Item Arithmetic Requirements

Each line item must be calculated to the nearest cent. The sum of all line item costs must equal the total estimate sum. All estimates must be reviewed and approved by a supervisor. Round all amounts to the same arithmetic as the original estimate.

2. Actual Cash Value Calculation

Actual cash value (ACV) must be calculated based on the replacement cost of the damaged property and condition of the property at the time of loss. The ACV must be calculated based on the replacement cost schedule. Round all amounts to the same arithmetic as the original estimate. ACV mismatches are not allowed.

3. Negative Amount Policy

No line item may have a negative amount. All line items must be documented with supporting evidence. Automatic claim suspensions are not allowed. Only with explicit approval from the adjuster.

4. Date of Loss Requirements

The date of loss must be entered in the date of loss field. Entry errors are not allowed. Claims for losses occurring on or after 1/1/2020 must be entered in MMDDYY format.

5. Required Fields

Every property must have a date of loss entered. The cause of loss must be entered. The claim suspension must be entered. The claim suspension must match the date of loss.

6. Covered Perils

Standard home ownership perils are covered. Aircraft damage is covered. Discharge, fire, and theft are specifically covered.
